

Concentration Requirements

MES 130 Introduction to Environmental Science (Can be taken in any year at Hampton University's Department of Marine and Environmental Sciences.).

CEE 458 Sustainable Development (A fall online course from Old Dominion University's Department of Civil and Environmental Engineering. Probably best taken after completion of math and physics requirements. Enrollment streamlined through Virginia Tidewater Consortium for Higher Education).

ARC 531 Introduction: Adaptation to Sea Level Rise (Open to any student third year or above [by permission of instructor]). Generally offered fall semester.

ARC 532 Adaptation to Sea Level Rise Design Program (Open to fourth and fifth year students. Offered each semester. Involves collaborative design work with engineering students. Stipends sometimes available.)
